About Me

I am a sharp, dependable professional who approaches challenges with clarity and determination. With a solid foundation in software development, I enjoy building practical solutions that add real value. Recognised for my reliability and approachable attitude, I encourage positive collaboration and contribute to productive, team-driven environments. My strong ability to adapt, communicate effectively, and deliver technical results makes me a strong asset in both technical and team-focused roles. I am committed to not only meeting expectations but exceeding them, ensuring that our collective goals are achieved.

Education

North-West University *Feb 2022 – Nov 2024*
BSc Information Technology

- **Average**: 76%
- **Coursework:** Data Structures and Algorithms, System Analysis and Design, Computer Networks, Information Technology Developments

North-West University *Feb 2025 – Present*
BSc Honours in Computer Science and Information Technology

- Currently enrolled
- **Coursework:** Artificial Intelligence, Databases, Decision Support Systems, Information System Engineering

Experience

Student Assistant *March 2023 – Present*
North-West University

My role is to provide one-on-one support to students with difficult course material, offering clear and personalised explanations to help them grasp the concepts better. I worked closely with lecturers to ensure grading was fair and consistent, while also improving my communication and mentoring skills by interacting with a diverse group of students.

Promoter *Nov 2021 – Feb 2022*
Samplex Africa

Customers were introduced to Xiaomi products in a calm, friendly, and approachable manner, ensuring they felt comfortable and well-informed throughout the experience. Time was taken to patiently answer their questions and clearly explain product features, helping them make informed decisions. Consistent, positive interactions built trust and cultivated genuine interest in the brand, creating a welcoming atmosphere that encouraged exploration of what Xiaomi has to offer.

Technical Skills

- **Programming Languages:** Python, JavaScript, Java, C#, C++
- **Web Development:** HTML5, CSS, SvelteKit, Node.js, React
- **Tools & Platforms:** GitHub, Vercel, Postman, Swagger, Docker, Azure
- **Databases:** MySQL, Oracle, PostgreSQL

Soft Skills

- **Continuous Learning:** Driven by a passion to constantly evolve in the industry
- **Team Collaboration:** Contributing positively to team environments.
- **Adaptability:** Quick to adjust to new tools and processes.
- **Problem Solving:** Break down complex problems for efficient solutions.
- **Attention to Detail:** Thorough in reviewing code and documentation.
